

# THE NONPROFIT TECHNOLOGY PARTNERS

## Technology That's Actually Moving Your Mission Forward, Not Holding it Back

Stop worrying about your tools not working when you need them, and stay focused on your mission

### Managed IT Support

Unlimited access to our world-class support team. This also includes proactive monitoring and maintenance, patch management, malware protection, documentation, cybersecurity tools, and regular check-ins from your dedicated customer success manager.

### Co-Managed IT

This plan is designed to support organizations that have an IT department but are looking for assistance with the daily care and maintenance of their IT networks. Get access to our service desk and enterprise-level management tools and services.

### Vulnerability Management-as-a-Service

Maintaining an ongoing cybersecurity program has traditionally been complicated and expensive. Our cybersecurity service changes the game, making cybersecurity simple, manageable, and affordable. Online, all the time, we help nonprofits detect, protect, and defend.

### Compliance-as-a-Service

Through a two-step process of Readiness and Monitoring & Maintenance your organization can be transformed into an always-ready, always-compliant nonprofit. Streamline and enhance your compliance efforts allowing you to spend more time on your mission.

### Strategic Services

Nonprofits have the same technology challenges as Fortune 500 companies, but most do not have the resources for a C-suite full of dedicated technology executives. That's where Strategic Services can help fill the gap, offering the high-level technical guidance that you need.

*"Collective knowledge from exceptional problem solvers that are respectful, attentive, and empathetic."*

*"RoundTable understands that there are people behind technology."*

*"You never feel like just a client."*

*"I get access to more experience and solutions than any one person could provide."*

# Our Member Success Model

## What is our Member Success Model?

We don't just want to be your IT vendor, we want to be a technology partner. Our Member Success Model is a proven method for ensuring success in implementing efficient, powerful technology to help your nonprofit succeed.

## You're Not Alone

Will your day-to-day technology problems be handled and off your plate? Absolutely. However, we believe that technology should help you *do more with less*, so your dedicated Customer Success Team will work with you to plan out your technology roadmap, so you always know where you're headed.

## Why Meet with Us?

### We Are All About Nonprofits

We understand what nonprofits are going through, working with limited resources, budget, and people.

### An Eye on the Future

We do our best to stay one step ahead of the curve, whether it's new legislation for Data Privacy, being on the forefront of Compliance Automation or AI, we're ready to help you.

### Our People Get It

We only hire personnel that are driven by serving those who serve, and we've had the opportunity to help hundreds of nonprofits get their technology under control.

### Learners and Educators

We value learning above all, and we hope it shows through our regular free webinars, classes, and content to help inform every level of your organization and promote a culture of technology.
